Professional Summary

Associate IT Consultant with around 2 years of experience in SharePoint Administration and Power Automate, with exposure to Azure and AWS data engineering. Skilled in workflow automation, enterprise system management, and building data-driven solutions using Python and SQL.

Skills

- **Core Competencies:** SharePoint Administration and Power Automate (Workflow Automation)
- **Secondary Skills (Exposure):** Data Engineering Technologies (Azure and AWS)
- **Programming & Databases:** Python, SQL, Core Java
- **Web Development:** Flask, Django, HTML, CSS, JavaScript

Work Experience

ITC Infotech India Limited, Bangalore

Aug 2024 - Present

SharePoint & Power Automate (Primary Role):

- Managed SharePoint sites, lists, document libraries, permissions, and custom views.
- Designed and implemented Power Automate workflows, replacing legacy Nintex workflows.
- Automated business processes, reducing manual effort and improving operational efficiency.
- Supported enterprise collaboration and document management solutions.

Data Engineering (Secondary Exposure):

- Built and optimized data pipelines using Azure Data Factory and Azure Synapse.
- Performed data transformations using PySpark and SparkSQL in Azure Databricks.
- Assisted in AWS-based ETL workflows using Glue, Redshift, and S3.

Internship

Andhra Pradesh State Skill Development Corporation (APSSDC)

July 2023 – Sep 2023

Web Development Intern

- Developed a real-time web application using Django, following MVC design principles with responsive UI.
- Integrated MySQL for dynamic content management and implemented CRUD operations.
- Built authentication and form-handling features for end-to-end functionality.
- Collaborated with peers to debug, test, and deploy applications in a simulated production environment.

Project

EMPLOYEE LEAVE MANAGEMENT SYSTEM (SHAREPOINT + POWER AUTOMATE)

- Designed and maintained SharePoint lists to manage employee leave requests and records.
- Developed Power Automate workflows to automate leave approval processes with multi-level approvals.
- Configured email notifications for request submission, approval, and rejection updates.
- Implemented role-based access control using SharePoint permissions.
- **Tools Used:** SharePoint, Power Automate
- **Outcome:** Reduced manual HR effort and improved process transparency and tracking.

DRUG DOSAGE CONTROL SYSTEM

- Designed a database schema in MySQL to store patient details, dosage records, and history.
- Built Flask-based backend APIs to calculate recommended dosages based on patient parameters.
- Implemented secure login and role-based access for doctors and patients with responsive UI.
- **Tools Used:** Flask, MySQL, HTML, CSS, Bootstrap
- **Outcome:** Reduced manual calculation errors by 80% and improved efficiency of dosage tracking.

Education

QIS COLLEGE OF ENGINEERING AND TECHNOLOGY

Jun 2020 - Apr 2024

B.Tech. in Computer Science and Engineering

CGPA: 8.55/10

Achievements

- Completed Azure Fundamentals (AZ-900) certification from Microsoft.
- Completed NPTEL certification on Python and Python for Data Science (Scored - 83%)
